

ABSOLUTE Turbo Clear A+B

Clear batches before further processing

This two-part clarification system also removes fine yeast residues that could cause unwanted flavours during distillation. One sachet is sufficient for 25 L; increase the number proportionally for larger batches. Clarification takes up to 24 hours, sometimes around 12 hours in cooler conditions.

Product specifications

Type	Two-part fining preparation (A+B)
Application	Wine and sugar washes
Yield	Up to 25 L per pack
Time to effect	Up to 24 hours
Net contents	65 g
Composition	Silica sol (sachet A); chitosan (sachet B)
Product number	122010

How to use

01 Rack the batch

After fermentation, carefully transfer the liquid off the sediment.

02 Add sachet A

Add A and stir vigorously for about five minutes to release carbon dioxide. Leave for one to two hours.

03 Add sachet B

Add B and stir gently without breaking up the developing flocs.

04 Allow to clear

Leave until fully clarified, for no more than 24 hours. Cooling can shorten this to about 12 hours.

Storage and safe use

Store in a cool, dry place. Follow the current instructions, dosage and safety information on the packaging. Keep out of reach of children. Check the best-before date and batch number on the pack.
