

CIAC Citric Acid

Adjust acidity precisely

Readily water-soluble citric acid lowers pH. It also binds metal ions and may help maintain colour and aroma stability. Determine the dose from measured acidity and the desired target.

Product specifications

Type	Acidity regulator
Application	Wine, beer and distillation mashes
Dosage	Individual dose based on measured current and target values
Recommended acidity during fermentation	6-9 g acid per litre
Properties	Readily soluble in water; lowers pH
Composition	Citric acid (C ₆ H ₈ O ₇)
Product number	122063

How to use

01 Measure acidity

Measure the batch before use and calculate the required amount from the target value.

02 Dissolve and add

Dissolve the citric acid in clean water, add it to the vessel and mix thoroughly.

Storage and safe use

Store in a cool, dry place. Follow the current instructions, dosage and safety information on the packaging. Keep out of reach of children. Check the best-before date and batch number on the pack.
