

# Nutri-Mono Nutrient

## A basic source of assimilable nitrogen

This single-component wine yeast nutrient supplies nitrogen and phosphorus from diammonium phosphate. It can help correct nutrient deficiency in must and support yeast growth and alcoholic fermentation. It may also be added directly to the batch.

|-----------------------|--------------------------------------------------|
| <b>Type</b>           | Single-component wine yeast nutrient             |
| <b>Composition</b>    | Diammonium phosphate                             |
| <b>Dosage</b>         | 10 g per 25–30 L                                 |
| <b>Application</b>    | Supplements assimilable nitrogen in must         |
| <b>Effect</b>         | Supports yeast growth and alcoholic fermentation |
| <b>Product number</b> | 121012                                           |

## How to use

### 01 Measure

Measure 10 g for 25–30 L of batch.

### 02 Mix

Dissolve the nutrient in a little water or must.

### 03 Add to the batch

Pour the mixture into the fermenter and distribute thoroughly.

## Direct addition

The nutrient may also be added directly to the batch. Mix the liquid thoroughly afterwards.

## Storage and safe use

Store in a cool, dry place. Follow the current instructions, dosage and safety information on the packaging. Keep out of reach of children. Check the best-before date and batch number on the pack.
