

VITAC

Protect colour and aroma against oxidation

Crystalline L-ascorbic acid acts as an antioxidant and helps limit unwanted changes in colour and aroma. Add it dissolved to wine or must and do not exceed the maximum on the current product label.

Product specifications

Type	L-ascorbic acid (vitamin C)
Dosage for wine	0.7-0.8 g per 10 L
Dosage for must	1-2 g per 10 L
Maximum dosage	2.5 g per litre; check the current label
Effect	Antioxidant and stabilising effect
Product number	122059

How to use

01 Measure

Calculate the amount from batch volume and type, then dissolve completely in a little water.

02 Add

Stir the solution into wine or must and observe the maximum dose on the current packaging.

Protection on several levels

This preparation helps preserve the colour and aroma of wine, supports microbiological stability and makes it harder for wild yeasts to develop.

Storage and safe use

Store in a cool, dry place. Follow the current instructions, dosage and safety information on the packaging. Keep out of reach of children. Check the best-before date and batch number on the pack.
